

# NORTHWEST SCIENCE & TECHNOLOGY

## Welcome to NWS&T

[print version](#)

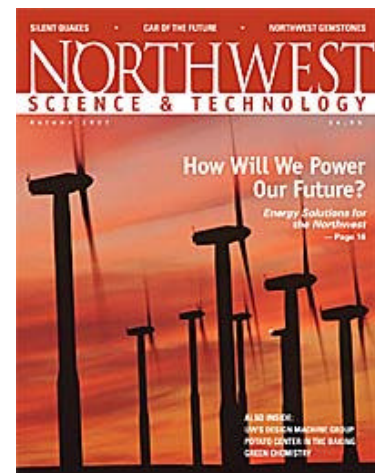

NWS&T is a news magazine covering science & technology in the greater Pacific Northwest (Washington, Oregon, Idaho, Montana, Wyoming, Alaska, British Columbia). It was launched March 1, 1999 by the University of Washington (UW).

Our mission is to provide more comprehensive coverage of science & technology in the region while serving as a platform for an expanded science writing curriculum at the UW.

**"I have spent my adult life supporting the advancement of science and technology. The Pacific Northwest has been the ideal place to live and to pursue these interests. Few places in the world inspire and support scientific innovation and discovery as well as this region, and no other publication covers the region's science and technology news and issues better than *Northwest Science & Technology* magazine."**

--W. Hunter Simpson  
Retired President & CEO  
Physio-Control Corporation
